AND STEP INTO MY WORLD OF OXYGEN

# Did you know ...

You **breathe** approximately **20,000** times a day ...

... and you spend **90%** of your time **inside**?

But the indoor air is up to **five times more polluted** than the outdoor air.

→ **Smart ventilation solutions eliminate indoor pollutants- and moisture build-up.**

# Did you know ...

**Windows** are the **biggest source of heating** in a well-insulated house.

Per 10m<sup>2</sup> of windows, you need 5kW of cooling capacity to neutralise **undesirable solar heat**.

→ **Intensive ventilation** combined with **solar shading** reduces your building's cooling load by up to **63%**.

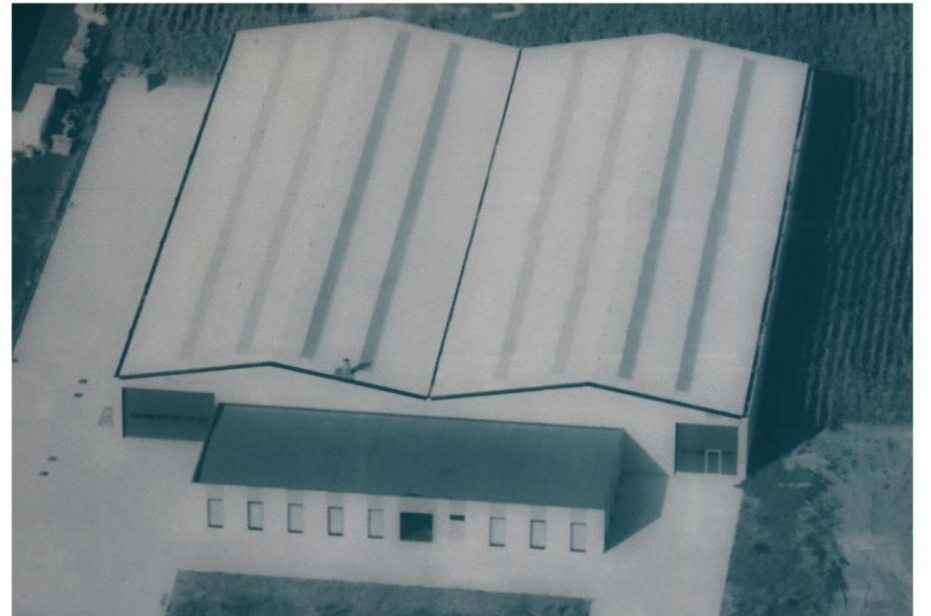

**Leading ...**

**... towards a healthy,  
comfortable and  
sustainable indoor climate!**

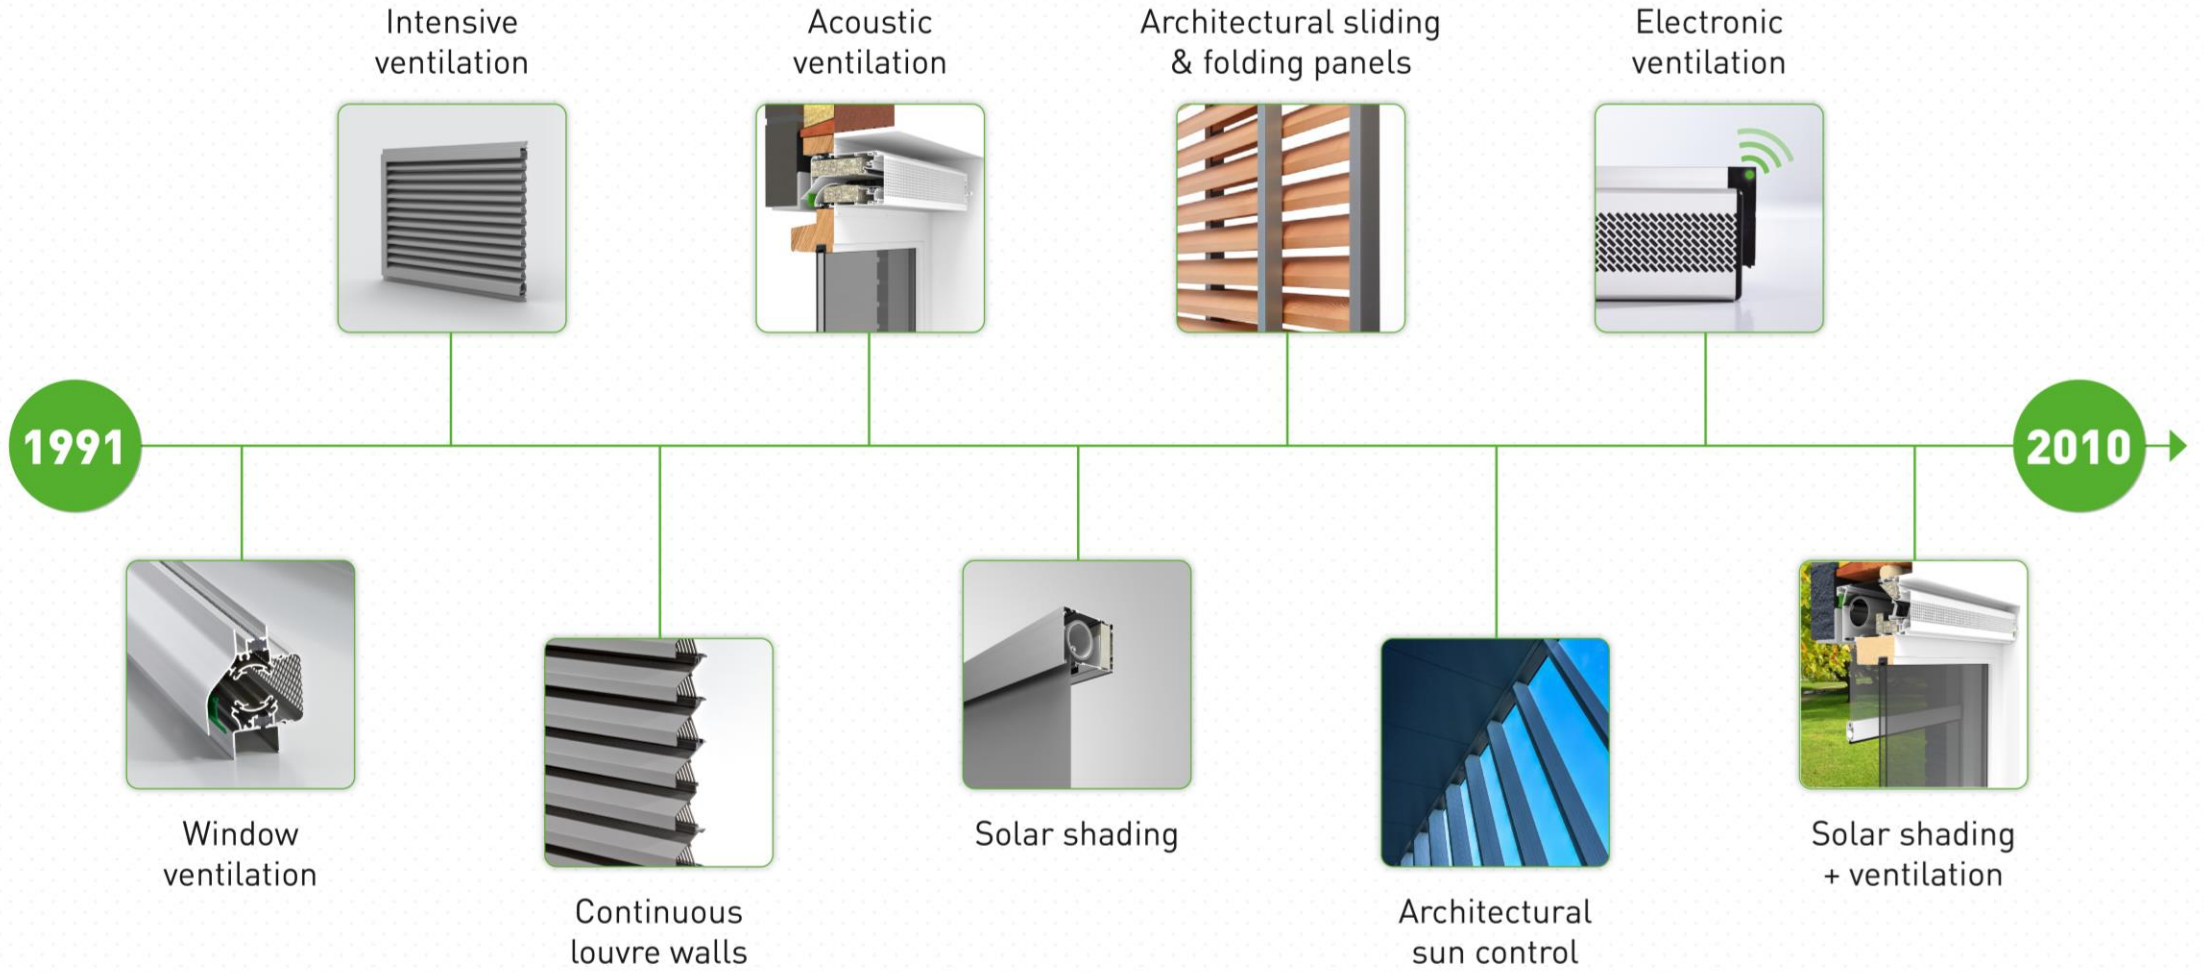

## DUCO: Ventilation and Sun Control

- Founded in 1991
