

DUCO's **burglar resistant** solutions

Louvre grilles and louvre doors with RC2 resistance class

Continuous louvre walls with RC3 resistance class

- Complete range of louvres
- Grilles and louvre doors in accordance with European regulation RC2
- Continuous louvre walls in accordance with European regulation RC3

DUCO's burglar resistant **total solutions**

DUCO offers a number of **innovative solutions** within its range of louvre grilles to meet **RC2 resistance class** requirements in accordance with European standards. The burglar resistant louvre doors are also available up to resistance class RC2. Thanks to a **patented system**, the continuous louvre wall systems even achieve **resistance class RC3**. DUCO has quite a few burglar resistant solutions available that are extremely suitable for **night ventilation / purge ventilation**.

DUCO's burglar resistant grilles, continuous louvre walls and doors can be used in **access areas, data centres, bicycle sheds, installations, technical rooms ...**

Test reports for all products are available upon request.

► Burglar resistant **LOUVRE GRILLES**

DucoGrille **Solid++ 30Z**

This burglar resistant grille with reinforced frame profile and sturdy Solid 30Z louvres is available as both a **recessed mounted** and **surface-mounted grille**.

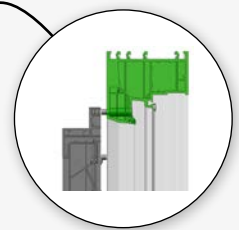

++ G 30Z

Recessed mounted wall louvre with flange

++ M 30Z

Surface-mounted wall louvre to be mounted on a window frame

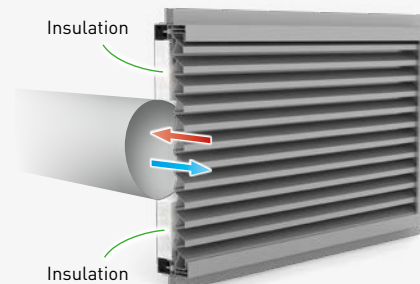

++ G 30Z
prEN 1627
up to and including 1630
(September 2017)

++ M 30Z
EN 1627:2011
NEN 5096: 2007
+ C2:2011

DucoGrille **Solid ISO 30Z**

The DucoGrille Solid ISO 30Z is a window louvre that is both architecturally aesthetic and has **good thermal insulation**. The window louvre can be connected to both round and rectangular air ducts.

NEN 5096:2012
&
EN 1627:2011

DucoGrille **NightVent**

The DucoGrille NightVent is a **glass-replacing ventilation hatch** which, because it supplies large ventilation flow rates, ensures efficient cooling of any building. The DucoGrille NightVent consists of a burglar resistant and insect-proof external louvre grille and an inner panel with a flat finish.

► Burglar resistant **CONTINUOUS LOUVRE WALL SYSTEMS**

DucoWall

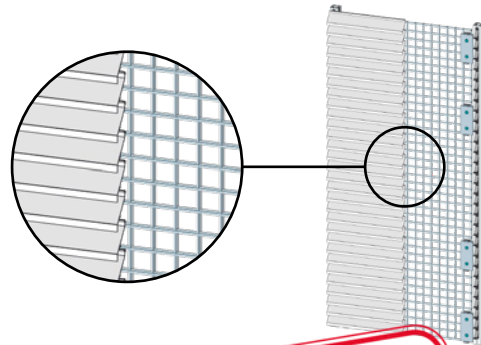

DUCO has developed a **broad and innovative range** of continuous louvre wall systems: water resistant, with high ventilation capacity, sound absorbing ...

From now on, **any type of continuous louvre wall can be made burglar resistant***, by incorporating DUCO's patented solution. This means that the continuous louvre wall complies with resistance class RC3 according to the European standard. This compact solution also ensures that **the installation depth of the RC3 louvre wall remains the same** compared to standard louvre walls, which guarantees a **uniform façade appearance**.

In addition, the louvre walls can be combined with **DucoDoor louvre doors** which can also be made burglar resistant (RC2).

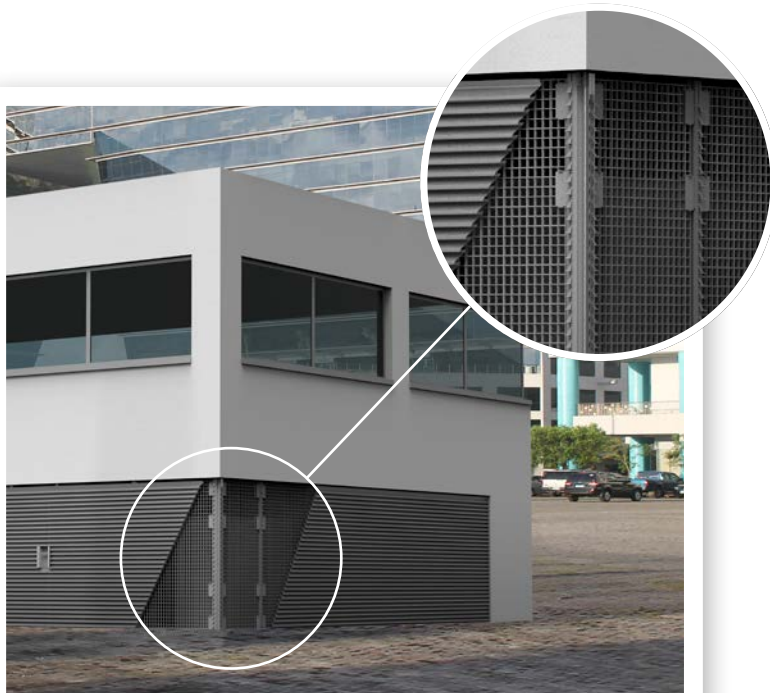

* Except DucoWall Classic W 60C/2, W 60C/3, DucoWall Acoustic W 300 and DucoWall Screening Acoustic Double Bank

► Burglar resistant **LOUVRE DOORS**

DUCO's louvre doors are available with RC2 resistance class and can be perfectly combined with DUCO's continuous louvre wall system for a sleek and uniform façade appearance. They are available as ventilating or (draught-proof) false louvre doors.

DucoDoor **Louvre**

This type of louvre door can be easily concealed in the continuous louvre wall because the **entire range of Solid, Classic and Screening louvres** can be used.

DucoDoor **Grille**

As a **freestanding access door**, the DucoGrille is perfectly suited for non-louvre walls, such as technical rooms.

All DucoDoor doors are custom-made and are available up to a maximum of 3 m useful height and width.

HOME OF OXYGEN

DUCO provides oxygen to every building in a natural way. Bringing fresh air directly into the building through the façade, without complex supply ducts, is the ultimate guarantee for a healthy indoor climate. The health and well-being of the residents are therefore at the forefront with DUCO.

A well-thought-out combination of basic ventilation, purge ventilation and solar shading ensures optimal air quality. DUCO offers an innovative solution for homes, offices, schools, or healthcare institutions where everyone feels at home.

A SOLUTION FOR EVERY SITUATION!
