DUCO

DucoBox **Reno**

First choice for **sustainable renovation**

The **DucoBox Reno** is ideally suited for replacement projects. With this **smart renovation box**, installers can replace outdated ventilation systems up to 25 % faster. The DucoBox Reno is a smart, demand-controlled ventilation system that contains **smart sensors**. In addition, the system is very easy to adjust. The system combines the strengths of existing solutions and addresses the weaknesses. Moreover, the homeowner also benefits from a **better energy label**.

Quick exchange & calibration

Compact unit with smart mounting and adjustment principles

Maximum energy saving

Equipped with a humidity sensor as standard and can be expanded with a CO₂ box and/or room sensors

Easy to service

Quickly accessible parts, including the backward-curved extract fan.

Limited number of parts

DucoBox **Silent**

The mechanical home fan with improved performance

The DucoBox Silent is a compact, durable, and extremely energy-efficient extraction unit, developed for use within DUCO's demand-controlled ventilation systems. It removes humid and polluted air when necessary and in the right amount. Moreover, the DucoBox Silent has a simple balancing procedure and is equipped with an integrated central humidity sensor. Thanks to its construction and the efficient DC motor, the DucoBox Silent has a long service life.

Standard with central humidity measurement

Optionally expandable with local CO₂ /RH box sensor or room sensor

Save time = Save money!

Simplified balancing for serial construction.

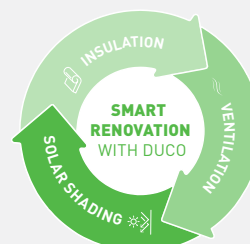

The QUIETEST ventilation box in the market!

Sound power of 46.5 dB for cabinet radiation

Smart renovation = demand-controlled ventilation

DucoBox **Focus**

The **smartest** ventilation box on the market!

Thanks to smart CO₂ and humidity control, the **DucoBox Focus** ventilates exactly where and when needed. The integrated **NightBoost** function prevents overheating. With **automatic calibration** under constant pressure, you can quickly set up the system. As an installer, you only need to adjust the valves once, saving 50 % of your time! The calibration can easily be copied to other DUCO systems for extra time savings. You can also speed up the process and generate a ventilation report with ease using the **Duco Installation App**.

Intelligent demand control

Control valve system based on CO₂ and humidity measurement

Smart zonal control

Up to 7 zones, expandable to 11 zones with duplicator

Maximum energy saving

Lowest reduction factor in the market

Discover the magic of zonal ventilation

Bring fresh air into your life, at the right time, in the right room

30 % less noise

40 % energy savings
